Conference Goals:
- Provide expert faculty presentations of current pharmacologic management for treatment of diseases with focus on acute care, neonatology, primary care, psychiatry, and women’s health.
- To gain understanding regarding the difference between generic and brand name medications with a look at the most prescribed medications.
- Discuss pharmacologic management for prevention and treatment of strokes, osteoporosis, and respiratory ailments.
- Discuss strategies for prevention of adverse drug reactions and prescribing medications for the older adult.
- Provide opportunities for collegial networking.
