**New Level of Care Unit choices in Admission Orders**

**What's the change?**
Starting December 2, 2015, some admission orders will include more specific unit choices for Level of Care within the order details. This allows you to indicate your preference and for better patient placement by Bed Board.

Orders include:
- Admit to Inpatient Status Order
- Place in Observation Status Order

**Admit to Inpatient Status Order**
When selecting the Level of Care for Admit to Inpatient Status, you will have more specific ICU unit selections. Indicate your preference of ICU unit by clicking it on the Order Sentences screen.

**Before change**

**After change**

On the Orders for Signature screen, the Level of Care you chose will display.

You will still need to provide the Attending Physician and Countersigning Attending.

If you chose Floor Bed or Step down unit for the admit order, you can continue to write your unit preferences under Nursing Unit Preference.
Place in Observation Status Order
When selecting the Level of Care for Place in Observation Status, you will have more specific bed unit selections. Indicate your unit preference by clicking it on the Order Sentences screen.

Before change

After change

Unit Choices:

<table>
<thead>
<tr>
<th>Unit</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WOBS</td>
<td>Surgical Observation unit at Wilmington—only used for patients after surgery</td>
</tr>
<tr>
<td>MOU</td>
<td>Only used for specific patients admitted to CCHP; the CCHP Attending will decide to place in this unit.</td>
</tr>
<tr>
<td>CSSU</td>
<td>Cardiac Short Stay Unit</td>
</tr>
<tr>
<td>PACU Phase II</td>
<td>For Post-op patients bypassing PACU Phase 1</td>
</tr>
</tbody>
</table>

On the Orders for Signature screen, the Level of Care you chose will display.

If you chose a CSSU/EDOBS unit, you will no longer need to write that in the Nursing Unit Preference.

You will still need to provide the Attending Physician and Countersigning Attending.
