Medical Student H&P/ Progress Note

All notes (H&P and Progress) generated by a medical student will now be filed in a specific folder within the Documents Hierarchy.

When a Medical Student is creating an H&P Note or a Progress Note, they should choose the **Type** of Medical Student Notes.

![Type:](image)

Then choose the appropriate H&P or Progress Note template.

- Med Students are required to forward their notes, both H&P and Progress Note, to their resident and/or attending for signature so that they can reviewed and cosigned. This is an integral part of medical student education.
- These notes will be part of the legal medical record, both authenticated and unauthenticated.
- **These document types will now display in the Documents section of the workflow.**

They may also be found in Message Center (if it was forwarded) or in the patient’s chart under Menu>Documents> Medical Student Notes.

- Residents and Physicians should not Modify a Med Student’s H&P or Progress Note. They should review and sign the Med Student note and create their own H&P or Progress Note.
