How do I customize existing specialty Dragon commands?

Some commands have already been created for your specialty and you can modify and customize those commands (macros) to suit your needs.
1. Open Dragon.
3. Click Command Sets.
4. Select your specialty folder.
5. Right click on the Command name (macro) you wish to modify.
7. The My Commands Editor dialog box appears.
8. You can change the name of the command in the My CommandName field.
9. Modify any of the existing information in the Content section.
10. Leave the Plain Text box checked.
11. When finished, click Save.
12. The new, saved copy will be located under Modes>MyCommands in the Task Pane, in the same folder name.

How do I make my own auto-text?

For every Dragon Command, an auto-text has been configured, but you can create your own customized auto-text as well.
1. In PowerChart, open the Documentation workflow to a text field.
2. From the text editor toolbar, click the Manage Auto Text button.
3. On the Manage Auto-text window, click the icon for New Phrase.
4. Enter an abbreviation and description for your text in the Abbreviation and Description boxes.
5. Click the Add Text icon.
6. The Formatted Text Entry window opens. Enter your text entry in the HTML section (bottom section) of the Formatted Auto Text dialog box.
7. Click OK.
8. Click Save, then click Close.

When using auto-text:

1. Press F3 on the keyboard to move to the first field.
2. Type the appropriate information.
3. Press F3 to move to the next field.
4. If adding an X to select an option, be sure to use a capital X.
5. Continue until all of the appropriate fields are complete.

When using Dragon commands and microphone:

1. Use the Dragon Next field key (or say “Next field”) to move to each bracketed field and dictate your findings.
2. If adding an X to select an option, be sure to use a capital X.
3. When complete, press the Accept Defaults key on the Dragon mic to remove the brackets.
